--- FUNCTION: Promotes colloidosmotic lysis by binding to the midgut epithalial cells of insects.
--- EDVELOPMENTAL STAGE: The crystal protein is produced during sporulation and is accumulated both as an inclusion and as part the spore coat.
--- MISCELLANBOUS: Toxic segment of the protein is located in the N-

Patent number US3322687, 21-JUN-1994.

-1- FUNCTION: Promotes colloidosmocio lysis by binding to the midgut epithelial cells of many lepidopteran larvae.

-1- DEVELOPMENTAL STAGE: The crystal protein is produced during sporulation and is accumulated both as an inclusion and as part of the spore coat.

-1- MISCELLANBOUS: Toxic segment of the protein is located in the N--
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Bacillus thuringiensis.

Repens J.M., Sick A.J.;

"Genes encoding lepidopteran-active toxins and transformed hosts.";

Patent number US5206166, 27-APR-1993.

-! FUNCTION: Promotes colloidosmotic lysis by binding to the midgut epithalial cells of many lepidopteran larvae.

-! DEVELOPMENTAL STAGE: The crystal protein is produced during sporulation and is accumulated both as an inclusion and as part of

Pesticidial crystal protein crylCb (Insecticidal delta-endotoxin
CrylC(b)) (Crystaline entomocidal protoxin) (133 kDa crystal protein).
Name=crylCb; Synonyms=crylC(b);
Bacilias thuringtensis (subsp. galleriae).
Bacteria; Firmicutes; Bacillales; Bacillus.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         part of

Pesticidial crystal protein crylJb (Insecticidal delta-endotoxin
CrylJ(b)) (Crystaline entomocidal protoxin) (134 kDa crystal protein).
Name=crylJb; Synonyms=crylJ(b), cryETl;
Bacillus thuringiensis.
Bacteria; Firmicutes; Bacillales; Bacillus.

Jr.;
"Bacillus thuringiensis cryet4 and cryet5 toxin genes and proteins
toxic to legoldopteran insects.";
Patent number US5322697, 21-JUN-1994.
-I- FUNCTION: Promotes colloidosmotic lysis by binding to the midgut
epithelial cells of many lepidopteran larvae.
-I- DEVELOPMENTAL STAGE: The crystal protein is produced during
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    311 DNRREHYWSGLEMTAYFTGFA-----GAOVSFPLVGTRGESAPPLTVRSVNDGIY---
